historically the scientific method has been said to require proposing a theory making a prediction of something not already known testing the prediction and giving up the theory or substantially changing it if it fails the test a theory that leads to several successful predictions is more likely to be accepted than one that only explains what is already known but not understood this process is widely treated as the conventional method of achieving scientific progress and was used throughout the twentieth century as the standard route to discovery and

experimentation but does science really work this way in making 20th century science stephen g brush discusses this question as it relates to the development of science throughout the last century answering this question requires both a philosophically and historically scientific approach and brush blends the two in order to take a close look at how scientific methodology has developed several cases from the history of modern physical and biological science are examined including mendeleev's periodic law kekule's structure for benzene the light quantum hypothesis quantum mechanics chromosome theory and natural selection in general it is found that theories are accepted for a combination of successful predictions and better explanations of old facts making 20th century science is a large scale historical look at the implementation of the scientific method and how scientific theories come to be accepted

all academic disciplines periodically appraise their effectiveness evaluating the progress of previous scholarship and judging which approaches are useful and which are not although no field could survive if it did nothing but appraise its progress occasional appraisals are important and if done well can help advance the field this book investigates how international relations theorists can better equip themselves to determine the state of scholarly work in their field it takes as its starting point imre lakatos's influential theory of scientific change and in particular his methodology of scientific research programs msrp it uses msrp to organize its analysis of major research programs over the last several decades and uses msrp's criteria for theoretical progress to evaluate these programs the contributors appraise the progress of institutional theory varieties of realist and liberal theory operational code analysis and other research programs in international relations their analyses reveal the strengths and limits of lakatosian criteria and the need for metatheoretical metrics for evaluating scientific progress
